DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear how the two steps of "contacting" and "introducing" could bring about any sort of separation ("A process comprising *contacting* a product mixture with a base...to produce a base-treated mixture and *introducing* said base-treated mixture to a distillation apparatus..."). The claim as written only actively states that a base is added to a product mixture. The examiner respectfully suggest that the base-treated mixture must actually be distilled, not simply introduced into a distillation apparatus (compare claim 22).

Claims 2-16 and 18-21 are also rejected under 35 USC 112, second paragraph, as claims which depend from indefinite claims are also indefinite. *Ex parte Cordova*, 10 USPQ 2d 1949, 1952 (PTO Bd. App. 1989).

Claim 23 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim recites the limitation "polyhydric alcohol." There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 5, 7, 8, 10-12, 14 and 17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by JP 08295654 (abstract), cited by applicant in the IDS. The reference teaches the purification of aniline by contacting a solution containing aniline and phenols with an aqueous solution of alkali (NaOH or KOH preferred). The molar ratio of alkali to phenol is 3-500. The oil layer is then distilled to give purified aniline.

Allowable Subject Matter

Claim 22 is allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: US 1,942,838, US 3,682,782, FR 732180 (CAPLUS abstract), RU 23412 (CAPLUS abstract) and SU 1051057 (CAPLUS abstract) are cited to show related processes.
